**ELiMS<sup>®</sup>**  
Electronic Library Management System

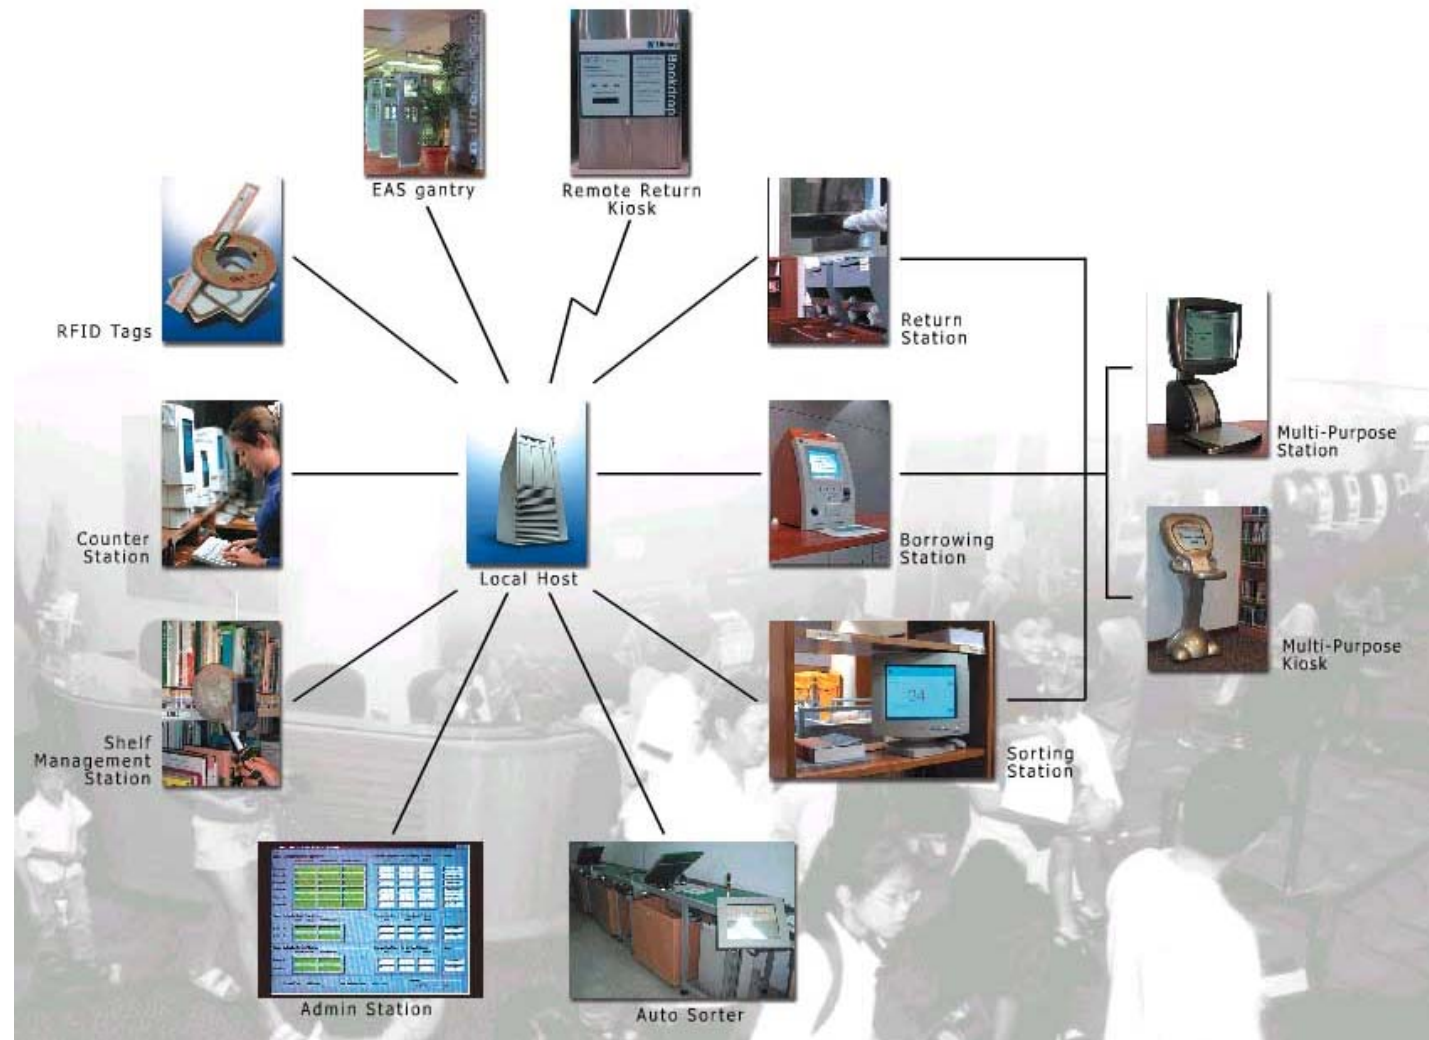

ELiMS<sup>®</sup>, the RFID Electronic Library Management System is designed to manage the tracking, distribution, circulation and flow of library materials.

It facilitates automatic and multiple object identification, tracking, sorting as well as speedier data collection, which tremendously improves the efficiency of librarians.

ELiMS<sup>®</sup> is basically made up of the components as shown in the configuration diagram. However at ST LogiTrack, we understand that customers have their own unique needs. Therefore, ELiMS<sup>®</sup> is designed to be modular and different components can be used to configure a system to suit your specific requirements. In fact, ELiMS<sup>®</sup> is an excellent platform upon which ST LogiTrack is continuously innovating to exploit the advantages of RFID to meet the dynamic and challenging needs of libraries.
